+1(647) 338-7428 ♦ Ontario, Canada ♦ manoshinath17@gmail.com

<https://www.linkedin.com/in/manoshi-nath> ♦ <https://github.com/manoshi0197/>

SKILLS

Languages	Java , C#, Python, Typescript, JavaScript, XML, HTML, CSS, JSON
Database	MySQL
Frameworks and Tools	Spring Boot, Hibernate, Apache maven, Jenkins, REST API, Bootstrap, Angular 12 React, Node.js, Docker, Swagger, Postman, AWS Cloud(EC2, S3), Confluence, GIT VSTS(Azure), JIRA

EXPERIENCE

Cognizant Full Stack Developer	Jan 2019 - Jul 2022
--	---------------------

- Utilized JAVA to develop website backend APIs that performed validation, processing, and saving of user web form input data in JSON and XML formats in a NoSQL AWS DynamoDB database, adhering to modern web architecture principles.
- Implemented microservices architecture to scale the application and integrated JENKINS for continuous deployment (CI/CD), which improved performance and resource management by 60%.
- Developed backend API in JAVA to save, validate, and submit data per client rules, utilizing REST protocols and AJAX, and ensuring data integrity with MySQL, enhancing business validation speed by 80%.
- Built and integrated a comprehensive authentication system with Spring Security using Spring framework, boosting platform security and reducing login-related support tickets by 25%.
- Designed and deployed 10 Angular forms(Asynchronous, Single Page Application) using Angular CLI, NgRx libraries, and Node.js from scratch using HTML5, CSS3, and Bootstrap5, operated by 5 clients, 15000+ users over 15 regions and 2 countries.
- Enhanced code quality by integrating Jasmine, Karma, JUnit, and Mockito for unit testing by using metadata from GIT and AWS cloud, achieving over 90% of test coverage and reducing critical bugs by 50%.
- Achieved outstanding client feedback by reducing the error rate to less than 1 percent among 15000 submissions.

EDUCATION

Master of Engineering, Carleton University, Ottawa, ON Relevant Coursework: Applied Programming, Neural Networks, Human Centric Interactions.	Aug 2022 - Dec 2023
---	---------------------

Bachelor of Technology, Rajiv Gandhi Prodyogiki Vishwavidyalaya Relevant Coursework: Operating Systems, C++	Aug 2015 - May 2019
---	---------------------

PROJECTS

Node.js Social Media REST API with MongoDB

Developed secure authentication processes for login and registration, and implemented CRUD operations utilizing MongoDB, facilitating smooth management of over 30 user accounts while enhancing post interaction capabilities through efficient routing optimizations. (2024- Ottawa, ON)

Covid 19 Chat Bot.

Individual project using artificial neural networks in PYTHON, Created application(responsive bot) based on NLP, Keras, tkinter, and JSON format libraries to train 3 layered neural network with 20,000 data using spyder development kit. (2023- Ottawa, ON)

Blood Donation Application.

Led a team of 4 to implement REST APIs for blood bank tracking using Spring Boot (ECLIPSE), JPA, Angular, JWT, and SQL; boosted data reliability and reduced processing errors by 35%. (2021- India)
